FULL STACK DEVELOPER

I have expertise in HTML, CSS, JavaScript, Typescript, React.js, Next.js, Node.js, Express.js, MongoDB, and Tailwind CSS, with seven months of hands-on experience. I am passionate about building user-friendly, high-quality web applications and continuously enhancing my skills. My focus is on solving problems creatively and efficiently while embracing new challenges.

Technical Skills

- **Languages:** JavaScript, TypeScript
- **Web Development:** html, Css, DOM Manipulation, Async Js, APIs, Node.js
REST APIs, Mongoose, Crud Operations, Authentication, Authorization Git &
Version Control, Redux Toolkit, ES6
- **WebDev Tools:** VSCode, Chrom DevTools, Postman, Github, Vercel, Cloudinary
- **Frameworks & Libraries:** Tailwind Css, React.js, Express.js, Next.js, ShadCN UI
- **Database:** MongoDB

Work Experience

A results-driven Full-Stack Developer with 1.5+ years of experience in building scalable web applications. Gained 7+ months of professional expertise with two companies, Phi Tech Solution and Sabsons Distribution, excelling in frontend and backend development. Skilled in delivering responsive, align user-centric solutions that with business goals and drive growth.

Phi Tech Solution & Sabsons Distribution

- Developed dynamic, responsive UI components with React.js for seamless cross-device experiences.
- Improved performance through state management using Redux and Context API.
- Collaborated with backend teams to build scalable and robust solutions.
- Integrated RESTful APIs to enable efficient frontend-backend communication.
- Built scalable e-commerce platforms, enhancing user engagement and operational efficiency.
- Maintained clean code by implementing best practices and conducting code reviews.

Personal Projects

- **Job Board:** I developed a full-stack job board platform featuring authentication, authorization, and job browsing with advanced filters such as city and niche-based searches. Job seekers can apply for jobs, upload resumes, update profiles, and track applications, while employers can post, manage, and delete jobs, as well as view applications. Automated emails notify users of new job postings relevant to their niche. The system also includes a forgot password feature. The project leverages **HTML, CSS, React, Express, MongoDB, Node.js**, and **NodeCron** for email automation.
